

# Drug Discovery and Therapy World Congress 2014

(June 16<sup>th</sup> - 19<sup>th</sup> 2014, Boston, USA)

[www.ddtwc.com](http://www.ddtwc.com)

## INTRODUCTION TO THE SPEAKER

<b>Speaker Name:</b> Manuel Mateos de Vicente, PhDr; Dr. Eng.	
<b>Affiliation:</b> None	
<b>Country:</b> Spain	
<b>Brief CV/Qualifications:</b> Dr. Mateos has done research on several engineering fields; on earth and use of waste using over 50 chemical products (In 7 books in English and one in Spanish). He is analyzing the alpha waves and magnets on our health as well as the role of acid fluids in our body. He has 10 books on water (a fluid) transportation in pipes.	
<b>Field of Expertise:</b> Hydraulic fluids (100 publications); clay minerals and its atomic composition (100 publications, 40 in English); Traffic safety (300 publications).	
<b>Lecture Title:</b> The role of hydrofluids in the origin of Alzheimer's disease, and cancer, as well as in multiple sclerosis and osteoporosis.	
<b>Scope of the Topic (max 50 words):</b> In our engineering problems concrete pipes are destroyed in acidic subsoil and the same should happen when pipes (myelin) or calcium carbonate (bones) are in human body or when alkaline environment creates mold.	
<b>Related Fields/Potential Audience:</b> Neurobiology, geriatrics.	
<b>To be filled in by the Organizing Committee:</b>
